EDUCATION

C# Web Developer Software University

09/2022 - Present

Sofia, Bulgaria

Professional Modules

- C# Fundamentals - Handle the standard functionality of the programming language. Understand the relationship between IT concepts. Breaking down intricate problems into executable computer steps for analysis. Proficient in working with linear data structures and adept at applying fundamental skills in HTML and CSS.
- C# Databases - Database expertise covering relational and NoSQL systems, SQL proficiency, CRUD operations, data handling, and storage. Skilled in database schema design, ORM mapping, and accessing data via Entity Framework and LINQ in C#. Proficient in working with XML and JSON.
- C# Advanced and OOP - Work with multidimensional and associative data structures. Application of basic algorithms and functional programming. Understanding the object-oriented programming paradigm and applying the principles of OOP. Using data encapsulation, Reflection API and Unit Testing.
- C# Web Development - Building web applications with ASP.NET Core MVC, emphasizing HTTP protocol, MVC pattern, and built-in authentication (users, roles, and sessions). Employing filters and middleware for enhanced functionality. Creating RESTful backends with ASP.NET Web API. Conducting comprehensive testing and deploying web applications efficiently.

Computer Science High School "Peyo K. Yavorov"

09/2019 - 05/2024

Plovdiv, Bulgaria

Courses

- Informatics - Developed strong algorithmic skills, showcasing problem-solving abilities. Demonstrated expertise in designing and implementing various data structures. Fundamental knowledge of databases, functional and object-oriented programming.
- Information technology - Utilized graphic design tools such as Photoshop, GIMP, and Inkscape for creative projects. Applied video editing skills using OpenShot to produce engaging multimedia content. Excelled in project development, leveraging a diverse skill set to contribute effectively to team initiatives. Demonstrated proficiency in data analysis and management using Excel.

PERSONAL PROJECTS

Booking System (02/2024 - 04/2024) [🔗](#)

- Booking System is an ASP.NET MVC application for managing bookings for flights, hotels, and landmarks. It allows users to make reservations for various accommodations and attractions, with a focus on user verification and flexible booking options.

Simple Snake Game (09/2023 - 09/2023) [🔗](#)

- Simple Console application game, written in C#, showing what I have learnt in C# OOP Course - SoftUni.

ORGANIZATIONS

Student Council (09/2020 - 05/2024)

Vice-Chairman - As Student Council Vice Chairman, led events, advocated for peers, and fostered an inclusive, vibrant school community.
